

Appendix: Methodology and detailed results

1. Scope of the analysis

SlimrChat analysed **110 online UK Mounjaro providers** (all registered with the **General Pharmaceutical Council (GPhC)**). The analysis included providers with **publicly listed price-by-dose information** available on their websites on **18 May 2026**. Prices were collected from publicly available sources and verified at the time of analysis.

2. Standardised comparison model

To enable a fair, like-for-like comparison across providers, SlimrChat used a **standardised 76-week treatment model**. This timeframe aligns with the four-week dosing structure of Mounjaro pens and reflects the 68-72 week duration of major clinical trials measuring the efficacy and safety of GLP-1 weight loss drugs¹.

While this was not intended as medical guidance or a recommended treatment duration, it serves as a consistent, realistic framework for comparing projected medication costs over time. The model applied the following dosing pathway:

- **Weeks 1–4:** 2.5 mg
- **Weeks 5–8:** 5 mg
- **Weeks 9–12:** 7.5 mg
- **Weeks 13–16:** 10 mg
- **Weeks 17–20:** 12.5 mg
- **Weeks 21–76:** 15 mg

This reflects a stepped dosing structure followed by continued treatment at 15 mg for the remainder of the comparison period.

3. How costs were calculated

For each of the 110 providers, SlimrChat collected the publicly listed price for each Mounjaro dose and applied those prices to the standardised 76-week model described above.

This made it possible to calculate a projected **total 76-week treatment cost** for each provider on a consistent basis. **Table 1** shows an example of this methodology using **Medicine Market Place**, the lowest-cost provider in the analysis on 18 May 2026. Based on Medicine Market Place's published prices by dose, the total projected 76-week treatment cost was **£4.695**.

Table 1: Treatment Model Example (Lotus Weight Loss)

Period	Weeks	Mounjaro Dose	Lotus Weight Loss (17 Apr 2026)
1	1 - 4	2.5 mg	£137.00
2	5 - 8	5 mg	£154.00
3	9 - 12	7.5 mg	£205.00
4	13 - 16	10 mg	£229.00
5	17 - 20	12.5 mg	£246.00
6	21 - 24	15 mg	£266.00
7	25 - 28	15 mg	£266.00
8	29 - 32	15 mg	£266.00
9	33 - 36	15 mg	£266.00
10	37 - 40	15 mg	£266.00
11	41 - 44	15 mg	£266.00
12	45 - 48	15 mg	£266.00
13	49 - 52	15 mg	£266.00
14	53 - 56	15 mg	£266.00
15	57 - 60	15 mg	£266.00
16	61 - 64	15 mg	£266.00
17	65 - 68	15 mg	£266.00
18	69 - 72	15 mg	£266.00
19	73 - 76	15 mg	£266.00
Total:			£4,695.00

4. Ranking of providers

Once the 76-week cost had been calculated for each provider, SlimrChat ranked all 110 providers from **lowest total cost to highest total cost**.

This ranking is shown in **Table 2**. The lowest-cost provider identified in the analysis was **Medicine Market Place** at **£4,695**, while the highest-cost provider was **Treated** at **£8,069**.

Table 2: Complete Provider Rankings (76-Week Cost)

#	Vendor	76-week Cost
#1	Medicine Market Place	4 695

#110	Treated	8 069

5. Results summary

The analysis found substantial variation in the total projected cost of Mounjaro treatment across the 110 providers reviewed on 18 May 2026.

The key results were as follows:

- **Lowest cost:** £4,695
- **Median cost:** £5,380
- **Average cost:** £5,490
- **Highest cost:** £8,069

This means that the total projected 76-week cost ranged from **£4,695 to £8,069**, a difference of **£3,374** between the cheapest and most expensive provider.

Relative to the lowest-cost provider, this implies potential savings of:

- **£3,374 (a 72% difference)** compared with the highest-cost provider
- **£685 (a 15% difference)** compared with the median-cost provider
- **£795 (a 17% difference)** compared with the average-cost provider
- **£1,247 (a 27% difference)** compared with a leading high-street brand (Boots Online Doctor at £5,942)

6. Interpretation

The purpose of this analysis was to show how widely costs can vary for the **same medicine** when compared across online providers using a consistent 76-week treatment model.

The findings suggest that consumers focusing only on introductory prices may not see the full long-term financial picture. A provider that appears competitive at the start of treatment may not remain so over the course of a longer treatment journey.

7. Important notes

This analysis compares **publicly listed medication prices** and does not assess differences in consultation processes, bundled services, delivery arrangements or other non-medication elements that may vary between providers.

The **76-week period** is a standardised comparison framework only. It should not be interpreted as medical guidance or a recommended treatment duration.

This is a dynamic market with dynamic pricing. This analysis was completed on 18th May 2026. Prices may have moved after this date but this represents the spread of pricing across the market. SlimrChat's pricing information is regularly updated.

8. Bridging the information gap

To support greater transparency, SlimrChat has launched a free Mounjaro Treatment Calculator, allowing users to:

- Compare 100+ UK GPhC-registered providers

- Model costs over 52 weeks, 76 weeks or a fully customised journey
- Adjust time spent on each dose
- See the total projected journey cost rather than just the first month's price

The tool aims to address what SlimrChat describes as a growing 'information gap' between advertised introductory prices and the true long-term financial commitment.

Robert Price, Co-Founder of SlimrChat, added:

"Many people focus on the first month's cost, and some pharmacies promote introductory offers. But these treatments often involve gradual dose increases and use over an extended period of time. The real question is: what will this cost me over a year or more?"

9. Wegovy

SlimrChat's price comparison tools also track the same data for Wegovy.

About SlimrChat

SlimrChat is an independent editorial platform and online community providing practical tips and advice, shared experiences and support for people using or considering GLP-1 weight loss drugs. The platform combines articles, real stories, comprehensive price comparison tools and moderated community forums to help users navigate their weight loss journey with confidence.

SlimrChat does not sell weight loss drugs nor provide medical advice. It always encourages individuals to consult their doctor or healthcare provider regarding any treatment decisions.
